RQ1 | Traditional recommenders and LLM candidate-set rankers

Traditional recommenders
LLM rankers: BASE / LLMRANK

Shared local positive-forced 20-candidate protocol. Bars on BPRMF/GRU4Rec/SASRec/LightGCN = across-seed SD (5 seeds), not confidence intervals.
G1 invalid outputs contribute zero; traditional rankings are complete. MRR excluded (depth 10 vs 20). No paper-exact identity claim.
