RQ2 | Serendipity, diversity and item coverage

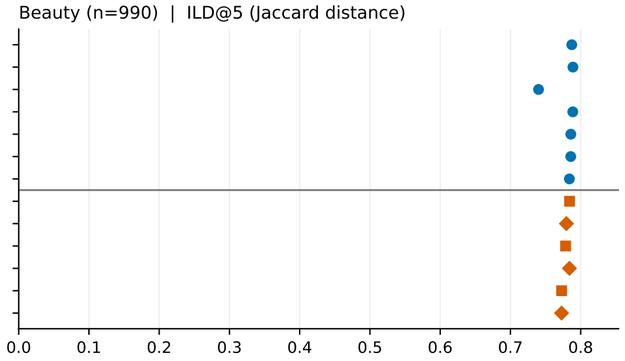

Traditional recommenders

LLM rankers: BASE / LLMRANK

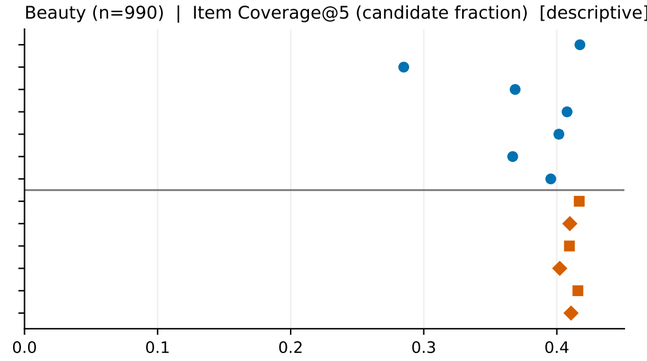

Beauty (n=990) | Serendipity@5 (fraction)

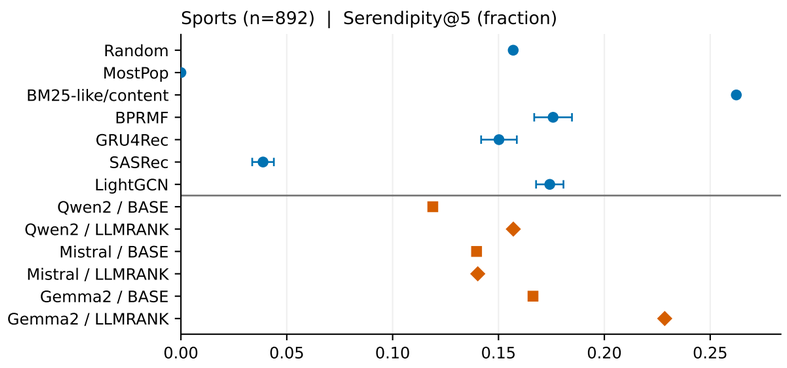

Beauty (n=990) | ILD@5 (Jaccard distance)

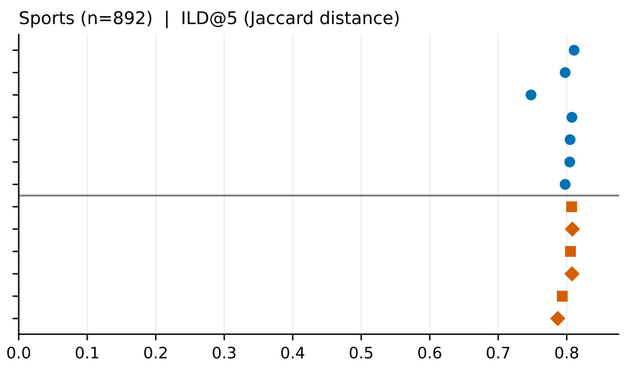

Beauty (n=990) | Item Coverage@5 (candidate fraction) [descriptive]

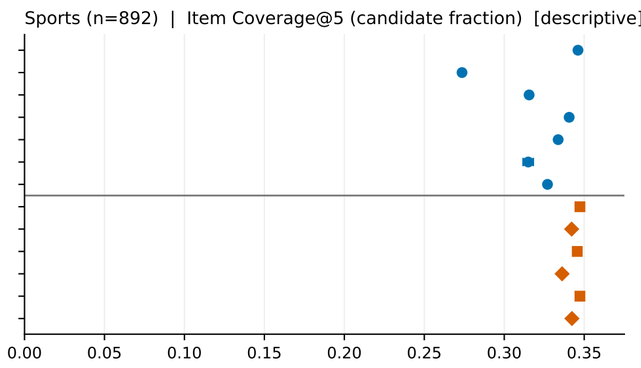

Sports (n=892) | Serendipity@5 (fraction)

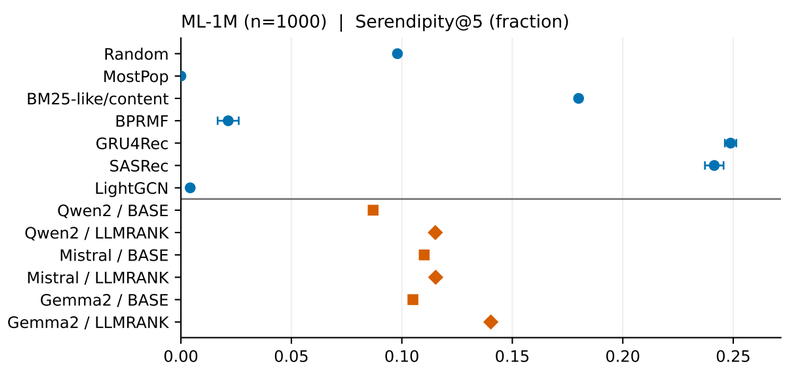

Sports (n=892) | ILD@5 (Jaccard distance)

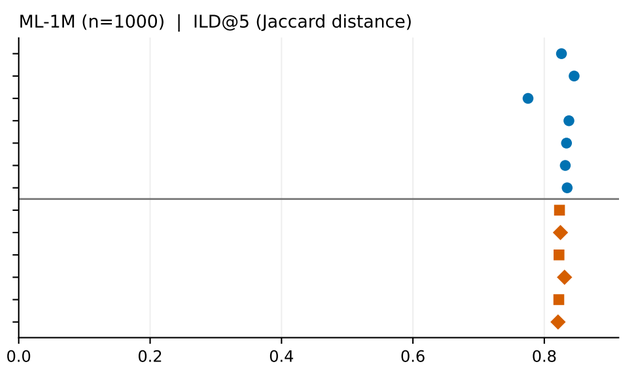

Sports (n=892) | Item Coverage@5 (candidate fraction) [descriptive]

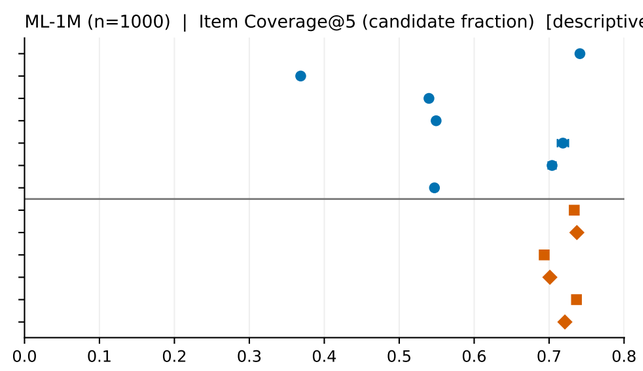

ML-1M (n=1000) | Serendipity@5 (fraction)

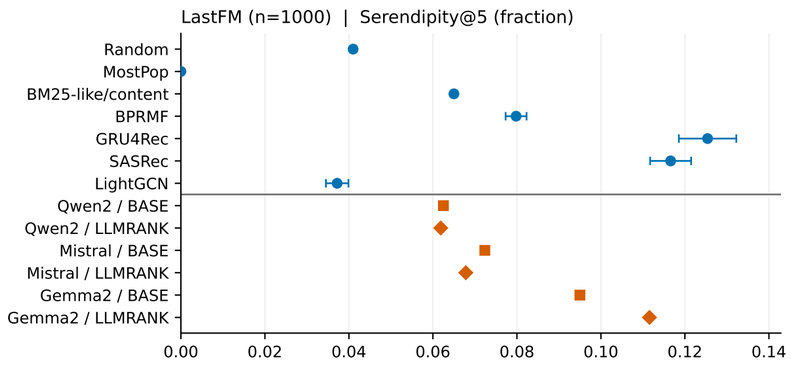

ML-1M (n=1000) | ILD@5 (Jaccard distance)

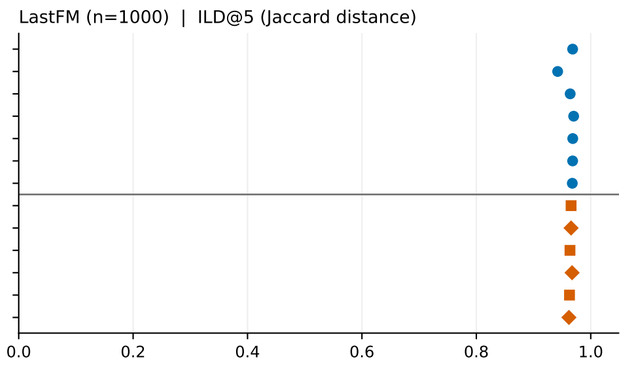

ML-1M (n=1000) | Item Coverage@5 (candidate fraction) [descriptive]

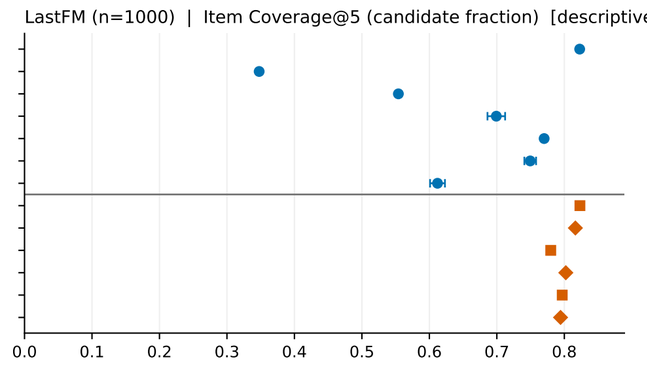

LastFM (n=1000) | Serendipity@5 (fraction)

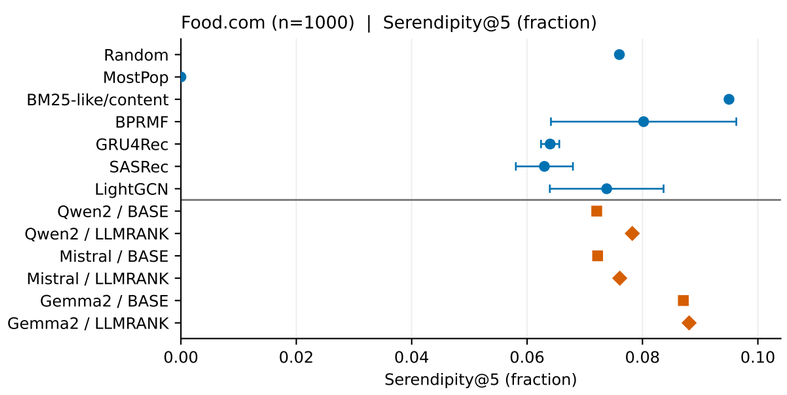

LastFM (n=1000) | ILD@5 (Jaccard distance)

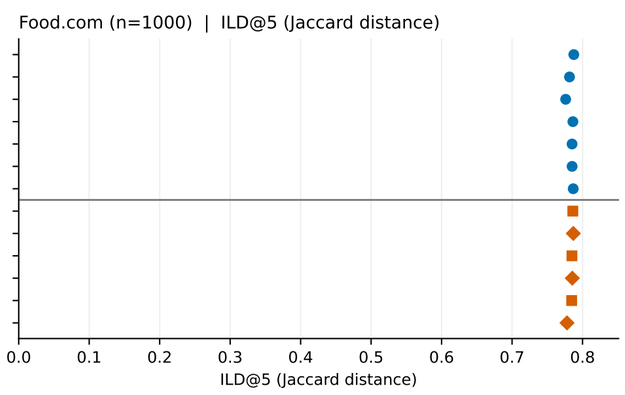

LastFM (n=1000) | Item Coverage@5 (candidate fraction) [descriptive]

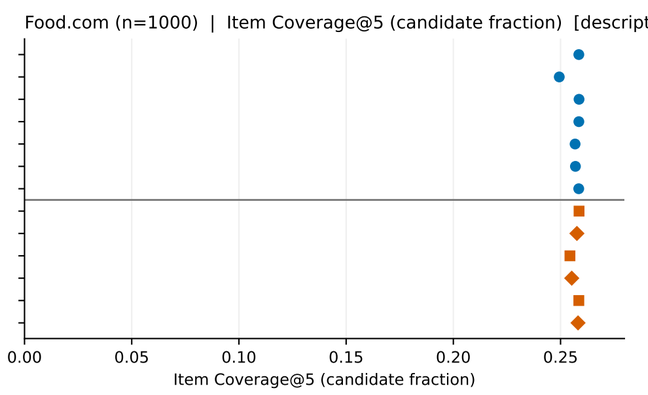

Food.com (n=1000) | Serendipity@5 (fraction)

Food.com (n=1000) | ILD@5 (Jaccard distance)

Food.com (n=1000) | Item Coverage@5 (candidate fraction) [descriptiv

Traditional: full cohort; LLM: strict-valid and metric-defined users. BPRMF/GRU4Rec/SASRec/LightGCN bars = across-seed SD, not CI.
Original metric units; adapted numerical comparisons, not matched-user causal effects or paper-exact reproduction. Item Coverage is descriptive only: its numerator depends on the retained population.
